

Fiber and Photos

March 2009
Friday, March 6th
6-9PM at the STHLNY Office

The exhibition features the photography of John Sharpless, MD, a local doctor of internal medicine and photographer. Dr. Sharpless has been developing his avocation of photography for more than thirty years, and has worked exclusively in digital format since 2002. His particular focus is on images of the natural world -- from around the world and around the corner -- making visible what is unseen but know in the heart.

Also exhibiting is Janet Rutkowski, who has been hooked on quilting since 1987 through classes and practice and Sember Lockwood (Hartman). She has made dozens of quilts, both by hand and machine, in a variety of style and sizes. Her current interest is in making "scrap quilts" to use up her substantial stash of fabric.
