

## LIST OF PARTICIPATING PROVIDERS IN THE STHL HIE

This list represents the currently participating healthcare providers that are authorized to have access to patient records through the STHL HIE for patients who have consented to sharing their records.

Once a patient has granted consent, only providers and their staff who have an existing healthcare relationship with the patient may view records associated with that patient. Within any healthcare organization, a user's role (clinical or administrative) will determine which fields within a patient's record can be viewed.

BROOME, CHENANGO, DELAWARE and TIOGA counties
